

Tables4Act

How to remove Keystroke Tables manually

In some cases, installing/uninstalling Keystroke Tables does not update or delete files from the Act program folder. This could cause problems with the program and this article covers how you can remove all these files manually so that it can be installed from scratch. Please follow the steps below to remove these files manually.

- Close Act and uninstall Tables4Act or Keystroke Tables from the Control Panel if present.
- Navigate to the Act program files folder. Please see table below for its location

Act Edition

Act Premium/Pro (v23 or older)
Act Premium Web (v23 or older)
Act Premium/Pro (v24 or newer)
Act Premium Web (v24 or older)

Location

C:\Program Files (x86)\ACT\Act for Windows
C:\Program Files (x86)\ACT\Act for Web
C:\Program Files\ACT\Act for Windows
C:\Program Files\ACT\Act for Web

- Once navigated to the appropriate Act folder above, open the **Plugins** folder.
- Delete the folder **Tables4Act**
- Navigate back to the Act folder and open the **Tools** folder.
- Find and delete all files starting with the word **Tables4Act**
- Reinstall Keystroke Tables and test.
